

The following list represents the documents currently available in the APS Online Archive. These 1200+ documents (many of them magazines, catalogs, or newsletters) total over 25,000 pages. These documents date as far back as January 1890, and include virtually every phonograph and gramophone related publication from 1950 to present. When an APS member enters a word or phrase in the "SEARCH" box, every one of these documents is searched for a word or phrase match, with the result returned in a matter of a few seconds. The documents included on the website are continually expanded throughout the year.

Coming soon: APS members will be able to casually browse the each of documents in this list by name and date as well, without doing a word or phrase search.
